

UX Testing + UI Iteration

		User Interface: How could the styling of elements be changed to make a more visually appealing, clear, and space efficient layout? (ex: sizes, colors, fonts, alignment, etc.)	User Experience: What elements of the user experience could be improved to make the puzzle more fun/satisfying? (ex: sounds, hover effects, etc.)
User 1 Name: Benjamin Alonso	<ul style="list-style-type: none">• Likes how the face in middle likes the layout• Make the center image have the mouse hover over it• Make the bottom buttons more noticeable	<ul style="list-style-type: none">• Likes the music• Make the middle image a bit smaller so it doesn't overlap with the others• Make the middle image brighter when you hover over it	
User 2 Name: Eric Marintsch	<ul style="list-style-type: none">• Likes the size of the albums• Likes the smoothness of the breakpoints• The border effect on buttons make it scale down when you click but not up when you hover• Section. 80 cover is kinda low res	<ul style="list-style-type: none">• You can't tell which song is currently being played (add something ex make the the div darker or brighter just make it pop)• The reset button should stop the audio being played• Change stop songs to stop	
User 3 Name: Jayden Martinez	<ul style="list-style-type: none">• Likes my layout• Have only the reset button	<ul style="list-style-type: none">• Make whats playing more obvious• When you click an album it resets all of the other photos and lil albums• Have an outline on the different songs to know which one ur hovering over	
User 4 Name: David Diaz	<ul style="list-style-type: none">• Its built fine but if it gets to small the images get small• Loves the way the albums are around the artist	<ul style="list-style-type: none">• When the lil divs show up make the album cover do something• Make it easier to know which song is currently being played	
User 5 Name: Jordan Dominguez	<ul style="list-style-type: none">• Likes the reset and stop song button• Make the bottom buttons more noticeable	<ul style="list-style-type: none">• Add some sort of hover or click effect to the lil-divs	

UI Before Feedback (Screenshot / GIF)

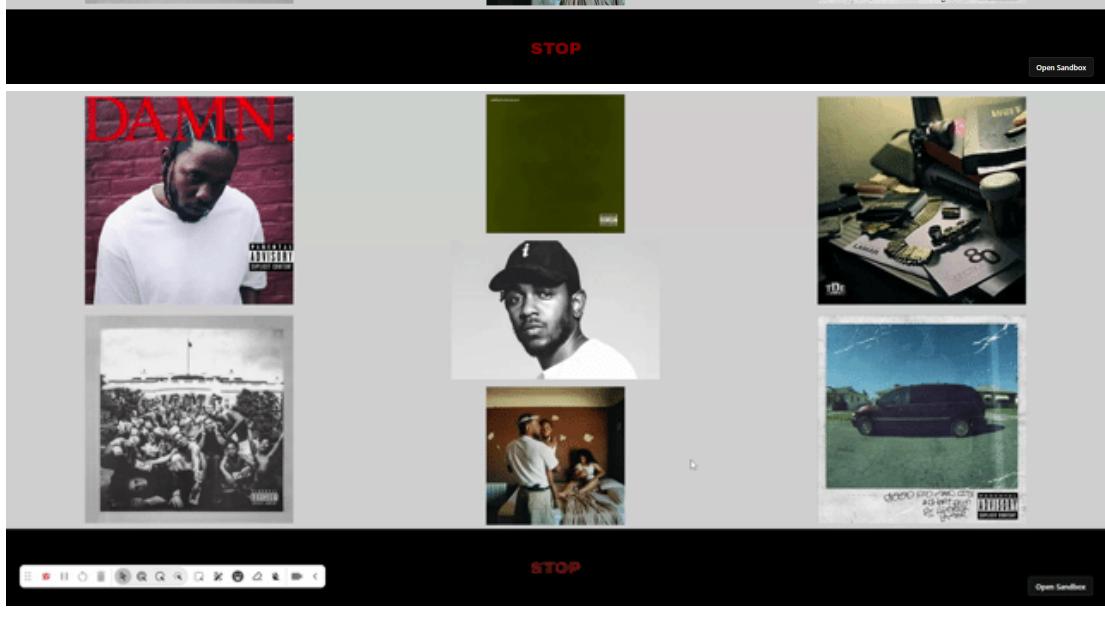

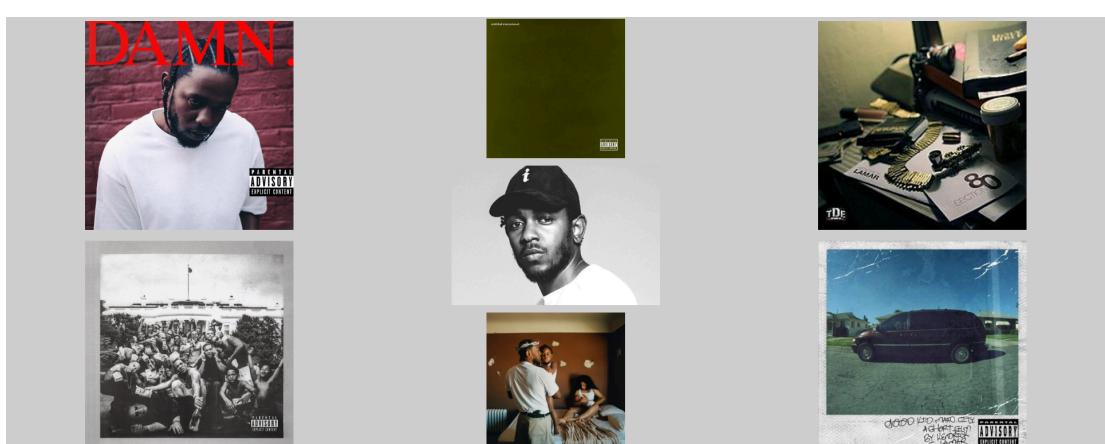

What trends did you identify in your feedback?

- Make the bottom buttons more noticeable
- Get rid of the reset button and make it so when you click on another album it gets rid of the other lil divs
- Make whatever song is being played more obvious
- Add a hover effect to the lil divs

UI After Feedback (Screenshot / GIF)

What changes did you make to improve your UI?

- Made the bottom buttons more noticeable
- Made the song being played more obvious
- Added a hover effect to the lil divs
- Changed stop songs to stop song
- Got rid of the reset button and made it so when you click on another album it gets rid of the other ones
